10East Corp. is a SaaS and BPO (Software as a Service and Business Process Outsourcing) Provider of Business Management Solutions to the North American Railroad Industry.

Jacksonville, FL - Tuesday, December 09, 2008

Today, 10East Corp. announced that The Indiana Rail Road has chosen and deployed the RailDOCS™ Preventive Maintenance Management System (PMMS) in support of preventive maintenance and government compliance logistics for their signal requirements. This includes the Tests & Inspections System, the Configuration Management System and the Plan Management Program. They join several shortlines and regionals that are successfully using RailDOCS™ including the Paducah & Louisville Railway, the Providence & Worcester Railroad, the Alaska Railroad, and others.

Jimmy Morgan, Director of Sales said, “Even though times are a little tougher and things are a little more uncertain, the day to day maintenance of the railroads continues, whether it’s the smallest shortline or the largest Class One. Our efforts this year to expand our RailDOCS™ Preventive Maintenance Management System shortline and regional railroad customers has continued to show results, as more and more of these railroads realize the value of having RailDOCS™ deployed as part of their maintenance and compliance activities. There is always a cost of compliance. The trick is to find a way to make the business process of maintenance and compliance more efficient, thus reducing that cost, while at the same time finding a way for that cost to produce a return on investment to the railroad company. RailDOCS™ does that and more, and because of this, our customer base continues to grow.”

Brian Hall, The Indiana Rail Road’s Supervisor of Signals said, “We looked around the industry for a solution that would address several issues we had within our signal maintenance organization, and could not find anything that met our requirements until we found RailDOCS™. Even though we are a smaller railroad, Configuration Management was a large concern for us, not only because of Federal mandates, but because having a configuration management system would allow us to track certain things that were more time-consuming to manage in the past. I can now manage quick and efficient remediation on my railroad, including OEM bulletins and internal railroad standards. I even know where all of my spare cards are. Basically, at any time, from anywhere, I can now see exactly what the status of the maintenance and compliance is for my signal department, with a few clicks of the mouse. Being able to keep an eye on our signal maintenance contractors is another large plus.”

Founded in 1986, The Indiana Rail Road Company is a 500-mile regional freight railroad, auling some 170,000 carloads of freight annually. Principal commodities handled include coal, petroleum products, plastics, ethanol, grain, aggregates, lumber, consumer appliances and other freight. The railroad serves

the Chicago gateway and terminals between Louisville, Indianapolis, and Newton, Illinois, with connections to virtually every major North American railroad. The company maintains headquarters in Indianapolis, Indiana.

10East Corp. is a SaaS/BPO (Software as a Service / Business Process Outsourcing) Provider of Business Management Solutions to the North American Railroad Industry. 10East's flagship service, RailDOCS™ (Railway Daily Operations Control System), has been enabling world class business management in the rail sector since 1996. RailDOCS™ provides companies with tools that enable the efficient management of business intelligence, business processes, personnel, projects, and tasks, while lowering capital and operating costs. RailDOCS™ is extensible to the mobile worker through the RailDOCS™ Mobile Business Platform, driving mobile business processes, the collection and dissemination of information, and communication with the front-line mobile employees, while also managing every aspect of the mobile applications, communications, hardware, and users. 10East customers include the rail giants BNSF Railway, Canadian Pacific Railway, CSX Transportation, Union Pacific Railroad, and a number of other railroads and rail transport oriented companies.
